Orders system, Operating Commands, Production and Sales

Orders software, Operating Commands, daily production and sales commands have been made and designed especially for many specialized in manufacturing and production.

The program follows up the orders starting from deals and contracts then operating orders for each department in the factory for producing its special items from order items then inserts daily production permissions for each department and specifying the number of the manufacturing machine concerning a certain deal and also delivery permissions to customers and issuing grouped bills for delivery permissions.

The program has been applied at many factories like stone, marble and granite factories.
